To Entegris Valued Suppliers,

We continue to experience government decisions to temporarily close or shelter-in-place to mitigate the impact of COVID-19. The following information conveys the applicability of these orders to Entegris operations and our suppliers.

Entegris manufactures and supplies products and equipment to the semiconductor, microelectronics, chemical and industrial gas, life sciences and other high-technology industries. These are industries that have each been deemed by the U.S. federal government as a “critical infrastructure industry” or that are otherwise exempt from the applicable state “shelter-in-place” orders. As such, our operations in the United States remain ongoing.

The health and safety of our employees and our supply chain partners remains our highest priority. We have practices in place regarding visitors to the site, remote work and social distancing. We greatly appreciate your transparency on any supply chain disruptions or challenges you are experiencing. Thank you for your continued support to allow us to continue our essential operations. If you have any questions, please reach out to your Entegris Commodity Manager contact.

Best Regards,

Sandy Gauthier
VP, Global Supply Management
