

Dear Valued Supplier,

Entegris is committed to the health and safety of all personnel entering our facilities. We ask that all employees and visitors only partake in essential travel at this time. While visitors are permitted at the sites, we ask that this take place only for critical meetings. Every effort should be made to conduct meetings via WebEx or videoconferencing or postpone non-essential meetings. Below are specific requirements that must be followed at our locations.

All Entegris facilities have been conducting Visitor Screening. Prior to visiting any Entegris location you must complete the following questions and provide your answers to your Entegris contact before your visit.

- Have you visited, or have been in close contact with someone who has visited, mainland China, South Korea, Europe or Iran in the last 14 days?
- To the best of your knowledge, have you been in close proximity with any person in the last 14 days that has contracted the coronavirus?
- Are you feeling ill at this time or have you experienced any flu like symptoms?

No entry will be granted to anyone who has:

- Visited China, South Korea, Europe or Iran until 14 days symptom free after their visit
- Been in close proximity (i.e. same room, same vehicle, same airplane or cruise ship) with someone who has contracted the virus, until after 14 days of being symptom-free
- Been feeling ill with flu like symptoms

Additional screening:

- Entegris facilities in MA, CT, NY, China, Taiwan, and Korea have implemented requirements for body temperature measurement for personnel entering any of our locations. All personnel on location in China, Taiwan, and Korea are also required to wear masks. Other facilities may adopt these same practices as the virus moves geographically.

We continue to monitor the COVID-19 situation closely and will advise of new developments, as well as any decisions regarding new or existing precautionary measures. If you reside in or have recently traveled to areas impacted by the coronavirus and believe you may have been infected, please do not travel to any Entegris sites. If after visiting an Entegris facility you are diagnosed with the virus, please notify your Entegris contact as soon as reasonably possible.
