50 YEARS OF PURE ADVANTAGE

**March 25, 2020**

To Entegris Valued Suppliers,

Effective March 18, 2020, the federal government of Malaysia implemented a Movement Control Order (“MCO”), which is currently in effect until April 14, 2020.

Entegris manufactures and supplies products to the semiconductor, microelectronics, chemical and industrial gas, life sciences and other high-technology industries. Entegris sought and obtained an exemption from the Malaysian government to the MCO, with the products manufactured by Entegris in Kulim having been deemed “essential goods.” As such, our Kulim facility is operating.

The health and safety of our employees and our supply chain partners remains our highest priority. We have practices in place regarding visitors to the site, remote work and social distancing. We greatly appreciate your transparency on any supply chain disruptions or challenges you are experiencing. Thank you for your continued support to allow us to continue our essential operations at our Kulim facility. If you have any questions, please reach out to your Entegris Commodity Manager or Buyer contact.

Best Regards,

Sandy Gauthier  
VP, Global Supply Management

Derek Ong  
Kulim Managing Director
