

## Entegris Sustainable Supply Chain Policy

It is Entegris' policy to maintain supplier relationships which are ethical, based on mutual benefit, and focused on a shared commitment to meet or exceed our customer requirements.

We believe building a sustainable and resilient supply chain, coupled with efforts to protect the environment and promote human rights and diversity throughout our supply chain, will directly strengthen Entegris' competitiveness.

Our operations are committed to upholding sustainable, responsible practices. As such, we have adopted the Responsible Business Alliance (RBA) Code of Conduct and have deployed it as our supplier code of conduct. The RBA Code of Conduct outlines Entegris' fundamental expectations for supplier business conduct with respect to labor and human rights, health and safety, environmental protection, and compliance with laws (including those prohibiting corruption and bribery) and ethics.

Entegris expects all of our suppliers to support the RBA Code of Conduct requirements.

Entegris wants to work with partners who share the same ethical principles and ideology of responsible business practices. We evaluate the performance, commitment, and continuous improvement to RBA when selecting and developing our suppliers.

Transparency in supplier ESG (Environmental, Social, and Governance) performance is required. Our suppliers are expected to continuously reduce their own environmental footprint, as well as social and governance risks in the creation of their products. As our suppliers develop new products, they should seek to reduce Entegris' environmental footprint as well as social and governance risks also.
